Chapter(s)	3717-1	
Chapter(s)	901:3-4	
Chapter(s)	3701-21	

The following procedures will be initiated except in the case of a violation that presents an immediate danger to the public health.

It is important to note that a single inspection report should not be used to evaluate the overall operation of an establishment. Looking at a facility's inspection results over a period of time gives a more accurate picture of that facility's commitment to compliance. For those facilities that show repeat violations and disregard for compliance the following procedures will be initiated.

Prevent. Promote. Protect.

III. Enforcement Protocol for Ongoing/Recurrent Failure to Maintain Within a Food Service Operation or Retail Food Establishment:

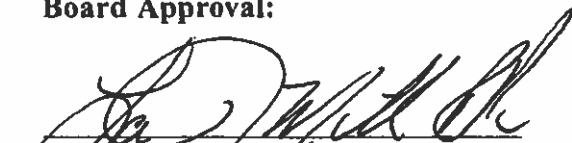

If repeat or similar violations are observed within 120 days of the last inspection the operation will be scheduled to appear before the board of health to state cause against license suspension/revocation.
